POS Executive Dashboard – KPI Source Guide

Company: Anabtawi Group | **Example date:** 16 October 2026 | **Scope:** All retail branches (cafe / corporate configs excluded on the dashboard)

> **Purpose of this document**
> Explain where each KPI card on the POS Executive Dashboard comes from, using the verified figures of **16/10/2026**. On this date the dashboard and the Daily Operations Excel report show the **same sales, cash, visa, online and pledge totals**, because both use one shared calculation based on POS sessions opened that day and the payment-method report-type mapping.

1. How the business day is defined

- **Sales, payments, cash moves, pledges:** POS sessions that *opened* on 16/10/2026 (local calendar day).
- **Advance orders and attendance:** business window **06:00 → 06:00** Amman time (16/10 06:00 to 17/10 06:00).
- **Payment channels** (Cash, Visa, Talabat, Careem, Mythings, Kabseh, Employee Debt, Hospitality, Advance Applied) come from the *Daily Operations Report Type* set on each POS payment method — not from hard-coded IDs.

2. Snapshot for 16/10/2026 (main cards)

Card	Value	Source in one line
Total POS Income	24,450.309	All session payments except Hospitality
Average Orders / Hour	11.46	3,031 paid orders ÷ total open hours of all sessions
Sales Without Tax (Net)	21,088.744	Each income payment’s untaxed share of its order
Total Sales Tax (VAT)	3,361.565	Each income payment’s tax share of its order
Average Basket	8.342	Income ÷ 2,931 paying orders (income > 0)
Total Discounts	149.728	Real discounts only (gift lines excluded)
Gifts (Hospitality)	243.473	Lines marked as gift (83 lines); price × qty
Cash Sales	14,996.600	Payments with report type Cash
Visa & Card Sales	7,753.419	Payments with report type Visa (includes CliQ if mapped)
Online & Delivery	1,506.040	Talabat + Careem + Mythings + Kabseh
Debt Sales	174.570	Payments with report type Employee Debt
Net Cash Moves	14,715.150	Cash In 15,460.050 − Cash Out 744.900
Net Pledge (Rahen)	230.000	Received 298.000 − Returned 68.000
Pledge Cash / Visa	163.333 / 66.667	Same pledges, split by cash vs visa
Advance Deposits	0.000	Deposits on advance orders created that day
Attendant Employees	116	Distinct employees who checked in (admin locations excluded)
Daily Employee Cost	1,607.258	Sum of (monthly wage ÷ days in month) per attendant
Approved Extra Hours	0.000	Approved overtime × hourly rate (daily cost ÷ 8)
Not Approved Extra Hours	91.123	Unapproved overtime amount (20.45 hrs)

3. Proof that the main totals are correct

3.1 Income = Net + Tax

Component	Amount (JOD)
Sales Without Tax (Net)	21,088.744
Total Sales Tax (VAT)	3,361.565
Sum	**24,450.309**
Total POS Income	24,450.309
Difference	0.000

Untaxed and tax are taken from the *income payments* (same base as Total POS Income), so by design: `Net + Tax = Total POS Income`. Hospitality, Advance Applied (deposit used at pickup) and cash rounding are already excluded.

3.2 Online & Delivery breakdown (matches Excel)

App	Excel / Dashboard share
Talabat	1,318.819
Careem	78.721
Mythings	108.500
Kabseh	0.000
Online & Delivery card	**1,506.040**

3.3 Dashboard vs Daily Operations Excel (same day)

Figure	Dashboard	Excel	Match?
Total Sales / Income	24,450.309	24,450.309	Yes
Cash	14,996.600	14,996.600	Yes
Visa	7,753.419	7,753.419	Yes
Online (sum of apps)	1,506.040	1,506.040	Yes
Rahen In	298.000	298.000	Yes
Rahen Out	68.000	68.000	Yes
Hospitality	Excluded from income	38.300 (own column)	Consistent

3.4 Average Basket

```
Average Basket = Total POS Income ÷ Paying Orders
```

24,450.309 ÷ 2,931 = **8.342 JOD** per paying order.

- **Paying order** = order whose income payments sum to more than zero.
- Excluded from the count: hospitality-only orders, refunds, and zero-total gift-only orders.
- That is why paying orders (2,931) are fewer than total orders (3,031).

3.5 Average Orders / Hour (All Branches)

```
Orders / Hour = Total paid orders ÷ Sum of open hours of all sessions
```

- Each session counts from opening time to closing time (or until “now” if still open).
- All branches’ open hours are added together, then divided into all orders.
- On 16/10: 3,031 orders ÷ open hours ≈ **11.46 orders per hour per average open branch-hour**.
- This is an activity / speed indicator, not a money amount.

3.6 Pledges and cash moves

Check	Calculation	Result
Net Pledge	298.000 − 68.000	230.000
Pledge Cash + Pledge Visa	163.333 + 66.667	230.000
Net Cash Moves	15,460.050 − 744.900	14,715.150

Pledges use the real receive / return date and the branch that handled the movement. Cash moves come from the Cash In / Cash Out lines of the day’s POS sessions.

4. Card-by-card source (summary)

Card	Data source	Included / excluded
Total POS Income	POS payments on sessions opened that day	Excludes Hospitality
Sales Without Tax / Tax	Same income payments, split by each order’s tax rate	Always sum to Total POS Income
Cash / Visa / Online / Debt	Payment method report type	Online = Talabat + Careem + Mythings + Kabseh
Discounts	Order lines with a discount %	Gift lines (100% gift flag) are not included here
Gifts	Order lines marked *is_gift*	Value = unit price × quantity
Net Cash Moves	Session statement lines (cash in / out)	Card shows In − Out
Pledges (Rahen)	Pledge receive / return records in the business day	Split into Cash and Visa by payment method

Advance Deposits	Advance orders created that day	Deposit amount at the origin branch; not counted again as Cash/Visa when applied later
Attendant Employees	HR attendance check-ins in the business day	Administration work locations excluded; branch from GPS or employee profile
Daily Employee Cost	Each attendant: monthly wage ÷ days in that month	One day cost per employee per branch per day; overtime is separate
Extra Hours	Overtime linked to attendance	Approved vs not approved; amount = hours × (daily cost ÷ 8)

Document prepared as internal documentation for the POS Executive Dashboard enhancements.
Example day: 16 October 2026. Figures taken from the live dashboard and Daily Operations Excel for that date.
